

Central Coast Chapter

<http://www.apics-centralcoast.org/>

We are pleased to announce our next class:

Certification in Production and Inventory Management (CPIM)
Module 1: Basics of Supply Chain Management (BSCM)

Jan 10th – March 13th, 2012
(Class meets every Tuesday evening)
6:00 PM - 9:00 PM
At The PG&E Education Center
6588 Ontario Rd
San Luis Obispo, CA 93405

We are pleased to offer this highly sought-after certification course to the general public, taught by Mr. Karl Klaesius CPIM, C.P.M.. This will be the only offering of BSCM (module 1) until 2013 (or later), so don't delay! We encourage all professionals and students to take advantage of this offer to seek your CPIM certification, or to learn valuable skills in Operations and Supply Chain Management. This is the same course we have taught to local companies.

Details: All participants receive a certificate of completion, and have the opportunity to take the CPIM-BSCM certification exam. The APICS CPIM Program consists of five courses modules, of which BSCM is the first, keystone module. The other 4 modules build on this one. All 5 exams (1 per module) must be passed to receive CPIM certification. To learn more about the CPIM curriculum, see pricing, or register for the class, please visit our website <http://www.apics-centralcoast.org>, e-mail training@apics-centralcoast.org, or call (805) 501-5556.

Questions? Free Information Session: Tues. Jan 3rd at 6pm

Dial +1 (636) 277-0134, Access Code: 701-347-608

Audio PIN: Shown after joining the meeting

A commitment must be received by January 3rd at 11pm to guarantee your course materials will be available for the first day of class, and to avoid a shipping charge.

The APICS CPIM Program

Module 1: Basics of Supply Chain Management - Now accepting enrollment, class starts 1/10/2012.

The basic concepts in managing the complete flow of materials in a supply chain from suppliers to customers are covered in the Basics of Supply Chain Management (BSCM) module. Supply chain concepts are introduced and basic terminology is emphasized, as are relationships among activities in the supply chain.

Module 2: Master Planning of Resources

The topics of demand management, sales and operations planning, and master scheduling are examined in-depth in this module. Both supply and demand planning for mid- to long-term independent demand are discussed. Priority planning and capacity planning issues also are addressed.

Module 3: Detailed Scheduling and Planning

This course focuses on inventory management, material and capacity scheduling and planning, supplier relationships, and the influence of lean and Just-in-Time philosophies in these areas. The course explains capacity planning in detail; introduces other capacity-planning techniques such as processor-dominated scheduling in continuous flow processes; and reviews project management techniques.

Module 4: Execution & Control of Operations

This module focuses on the methods for prioritizing and sequencing work, executing work plans and implementing controls, reporting activity results, and providing feedback on performance.

Module 5: Strategic Management of Resources

In this course, participants explore the relationship between strategic planning and the management and execution of operations. The course fosters higher-level thinking about how market requirements and social and economic sustainability concerns drive the operations, processes, and resource requirements of the firm.
