

Karl Klaesius

Karl Klaesius has 25 years experience in the nuclear power industry. The majority of his career was in the power plant instrumentation and controls field. He began in the final construction phase of a twin reactor power station and becoming specialized in radiation monitoring equipment. Later he was responsible for the radiation monitoring instrumentation at the power plant. For the last ten years of his career Karl worked on the supply chain side of power plant business. During that period he was certified in production and inventory management (CPIM) by APICS as well as becoming certified as a certified purchasing manager (C.P.M.) by ISM.

Karl has been an active APICS member since 1997 serving at the local, district, and corporate level within APICS. His most recent position was the 2010 Chair of the APICS Board of Directors. Karl is also an APICS instructor having taught all of the CPIM certification review courses as well as the Fundamentals of Materials and Operations Management series. He is an accomplished speaker having given presentations in North and South America, Europe and the APICS International Conference. He currently serves as a director on the APICS Education and Research Foundation Board of Directors.
